EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Catherine Kurtz Gowen on August 15, 2006.

The application has been amended as follows:

In the Claims:

In claim 1, replace the phrase, "providing a nucleic acid from a mammalian species sample not previously isolated or treated with a cell lysing reagent, comprising the steps of:" with the phrase, "isolating a free circulating, extracellular nucleic acid from a mammalian species sample not previously treated with a cell lysing reagent, wherein said method comprises the steps of:"

In claim 1, replace the phrase, "thereby releasing said nucleic acids" in step (C) with the phrase, "thereby releasing said free circulating, extracellular nucleic acids".

Examiner Comment

The support for the amendment is clearly found on page 10, lines 1-3; page 37, line 24 through page 39, particularly on lines 13-18, in the phrase, "[s]ince DNA released from white blood cells [DNA from WBC] is not expected to harbor mutations, deletions, or other specific cancer markers circulating in blood from a primary tumor, such non-target related DNA increases non-specific background, and therefore, has a deleterious effect on an assay for either free circulating DNA in body fluids..."

Art Unit: 1637

In addition, page 47, on lines 1-3 states the phrase, “[t]he utility of the method of the invention for isolating circulating DNA from serum of 20 normals and 30 individuals having confirmed cancer diagnosis.”

Taken the disclosure of the specification as a whole, the support for a method which isolates a nucleic acid from a sample, wherein said nucleic acid is free circulating and not from cells, is clearly evident.

Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance: prior art neither teaches or suggests for a method of isolating free-circulating, extra-cellular nucleic acid from a sample, wherein said sample is not previously treated with a cell lysing reagent via addition of the claimed weakly basic polymer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Inquiries

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Young J. Kim whose telephone number is (571) 272-0785. The Examiner is on flex-time schedule and can best be reached from 8:30 a.m. to 4:30 p.m (M-W and F). The Examiner can also be reached via e-mail to Young.Kim@uspto.gov.
